

# Adobe XD to HTML

Claudia Jacques

# Install Web Export in XD

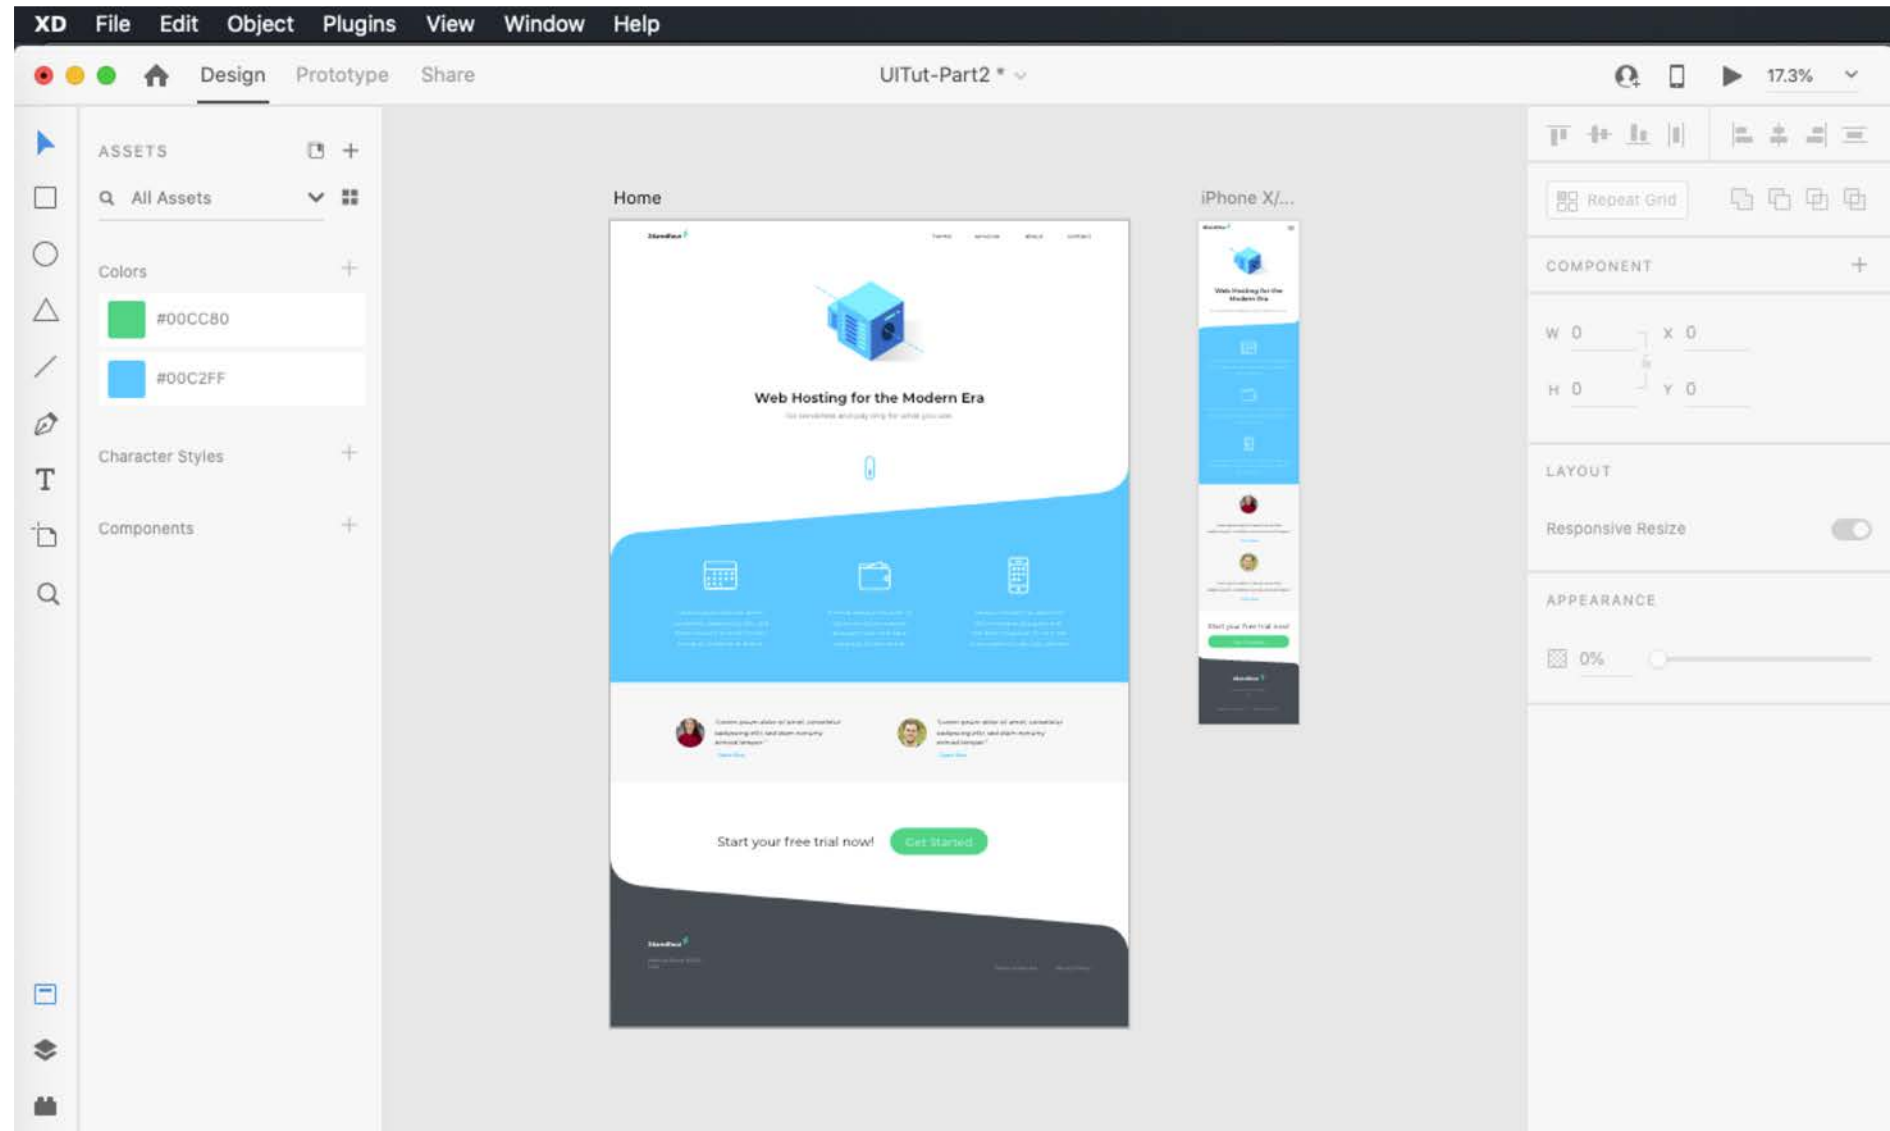

7. Open Adobe XD
2. Select **Add-Ons**
3. Select **Plugins**
4. A new screen appears.
5. Search for **Web Export**.
6. Click on Install **Web Export**.

**7. Open the XD file you want to export.**

**8. Select the artboard you want to export by clicking on it.**

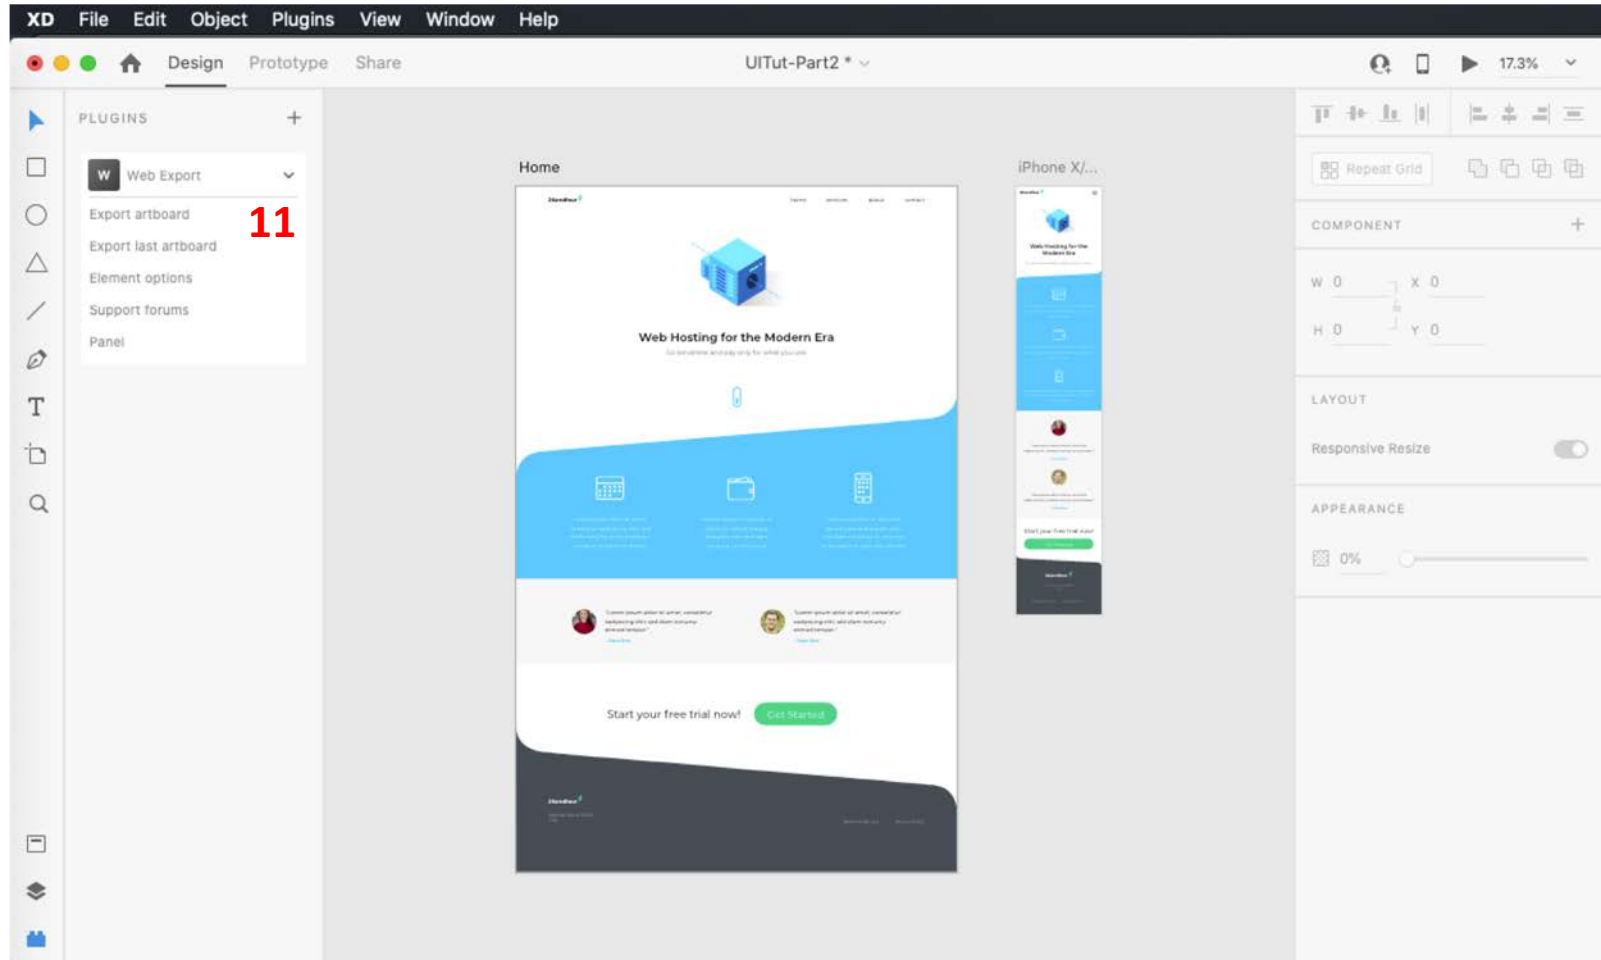

**9. Click on the Plugins icon.**

10. The Plugins panel opens.

11. Choose the **Export Artboard** option from the new **Web Export** plugin settings.

From the same window, you can also choose to export multiple artboards or the last artboard you edited.

**12.** In the Export Artboard pop-up, **add a page title** (the name that appears in the browser) and the **file name**.

**13.** **Select the folder** in which you wish to save the file by clicking on the tiny folder icon next to the Export Folder option.

The image shows the 'Export Artboard (live)' dialog box. It has a title bar with 'Export Artboard (live)' on the left and 'Home (1 of 2)' with navigation icons on the right. The dialog is divided into several sections: Name, Stylesheet, Script, Export Folder, Server, Alternative Fonts, Scale, Options, and Export. Red annotations are present: '12' is placed to the left of the 'Name' field, which contains 'Page Title' and 'File Name'. '13' is placed to the left of the 'Export Folder' field, which contains 'Folder to Save the Exported Files'. A red arrow points from this text to a small folder icon on the right side of the 'Export Folder' field. At the bottom, there is a row of buttons: Help, Basic, Reset, Copy Page, Copy Markup, Copy CSS, Close, and Export Live. A note at the bottom of the dialog reads: 'Select the folder to export to and then press the export button (or press enter)'.

Field	Value	Annotation
Name	Page Title   File Name	12
Stylesheet	Stylesheet name (optional)   External stylesheet <input type="checkbox"/>	
Script	Script name (optional)   External script <input type="checkbox"/>	
Export Folder	Folder to Save the Exported Files	13
Server	Server name (optional) (ex http://localhost/ or http://127.0.0.1/)	
Alternative Fonts	Alternative fonts (optional)	
Scale	Default   Scale on Resize <input type="checkbox"/> Scale on double click <input type="checkbox"/>   Reset scale on double click <input type="checkbox"/> Show scale slider <input type="checkbox"/>   Enable scale up <input type="checkbox"/>	
Options	Center Horizontally <input type="checkbox"/>   Center Vertically <input type="checkbox"/> Set styles inline <input type="checkbox"/>   Style via classes <input type="checkbox"/> Outline elements <input type="checkbox"/>   Add data names <input type="checkbox"/> Markup only <input type="checkbox"/>   Keyboard Navigation <input type="checkbox"/> Add image compare <input type="checkbox"/>   Auto refresh <input type="checkbox"/>	
Export	Selected artboard   Multiple pages   Global <input type="checkbox"/>	

**14.** Choose to add the external **stylesheet** (CSS) to the exported file.

**15.** Choose to add the external **script** (JS) to the exported file.

**16.** Choose to add alternative **fonts** to the exported file.
